## Product Description

### *Indoor Full Body Box Camera*

Congratulations on your purchase of this product. This analog surveillance camera features advanced functions in a compact body and is suited for tight, indoor environments such as a corridor or elevator. The camera utilizes advanced Sony image sensor technology producing high definition, realistic color.

## Features

- Indoor housing
- High Resolution 650 or 700 TV Lines
- C/CS Lens Mount
- Low Light Illumination
- Day / Night
- Digital Wide Dynamic Range, On Screen Display, 3D Digital Noise Reduction, Sense-UP
- 12V DC or 12V DC/24V AC (Model Dependent)

## Models

Model Number	Resolution	Lens	Features
ELI-EFB-65	650 TVL	Sold Separately	
ELI-EEFB-70	700 TVL	Sold Separately	Effio Chip, Dual Voltage

## Safety Information

1. Read these instructions.
2. Heed all warnings.
3. Follow all instructions.
4. Clean only with dry cloth.
5. Do not block any ventilation openings.
6. Do not install near any heat sources such as radiators, heat registers, stoves, or other apparatus including amplifiers) that produce heat.
7. Only use attachments/accessories specified by the manufacturer.
8. Pay attention to the power requirements.
9. Stop operation immediately when something is wrong with the product. If smoke or the smell of smoke comes from the product, continued use will result in fire, injury, or damage to the product.
10. Turn the power off immediately and contact qualified service personnel for service.
11. Be sure to turn off the power before wiring. Failure to observe this may cause electric shock. A short circuit or wrong wiring may cause fire
12. This product has no power switch. Turn the power off when cleaning the product.
13. When continuously viewing a bright light source such as a spotlight, the color filter of the CCD may have deteriorated and it may cause discoloration. Even when changing the fixed viewing direction after continuously viewing a spotlight for a certain period, the discoloration may remain.
14. Keep the camera cable away from the lighting cable. Failure to observe this may cause noise.
15. When the camera is used near a TV/radio antenna, strong electric field, or magnetic field (near a motor or a transformer), images may be distorted and audible noise may be produced. In such a case, route the camera cable through specialized steel conduit tubes.

**CAUTION: TO REDUCE THE RISK OF ELECTRIC SHOCK, DO NOT REMOVE COVER (OR BACK). NO USER SERVICEABLE PARTS INSIDE. REFER SERVICING TO QUALIFIED SERVICE PERSONNEL.**

## FCC Statement

THIS DEVICE COMPLIES WITH PART 15 OF THE FCC RULES. OPERATION IS SUBJECT TO THE FOLLOWING TWO CONDITIONS:

1. THIS DEVICE MAY NOT CAUSE HARMFUL INTERFERENCE, AND
2. THIS DEVICE MUST ACCEPT ANY INTERFERENCE RECEIVED, INCLUDING INTERFERENCE THAT MAY CAUSE UNDESIRABLE OPERATION.

This equipment generates and uses radio frequency energy, and if not installed and used properly, that is, in strict accordance with the manufacturer's instructions, it may cause interference to radio and television reception. It has been type tested and found to comply with the limits for remote control devices in accordance with the specifications in Sub-Parts B and C of Part 15 of FCC Rules, which are designed to provide reasonable protection against such interference in a residential installation.

However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause interference to radio or television reception, which can be determined by unplugging the equipment, try to correct the interference by one or more of the following measures.

- Reorient the antenna of the radio/TV experiencing the interference.
- Relocate the equipment with respect to the radio/TV.
- Move the equipment away from the radio/TV.
- Plug the equipment into an outlet on a different electrical circuit from the radio/TV experiencing the interference.

If necessary, consult your local dealer for additional suggestions.

NOTE: Modifications to this product will void the user's authority to operate this equipment.

## Product Components

### Box Contents

- Camera
- Quick Start User Guide

### Additional Materials Needed for Installation

- Mounting Bracket
- Lens
- Tape for protecting connections
- Power supply

## Product Diagrams

## Installation

### Mounting

This is an indoor camera. It is not suitable for exposure to particles or liquids.

Please note the camera's operating temperature of  $-10^{\circ}\text{C} \sim 45^{\circ}\text{C}$ . Avoid using the camera at too high or too low temperatures.

Never make the camera face the sun or bright object or you may damage the image sensor.

Do not mount the camera near a radiator, heater, or other heat source.

**Caution:** Once power is supplied, do not remove the camera from the mounting base due to risk of electrical shock.

This camera uses a standard mounting bracket, sold separately.

This camera accepts lenses with a C/CS lens mount. Lens sold separately.

## Connections

1. Use a BNC connector to connect the camera's VIDEO OUT to the monitor's (or DVRs) VIDEO IN. Use the following recommendations for cable types and distances:

Maximum Cable Length				
Type of Coaxial Cable	RG-59/U	RG-6/U	RG-11/U	RG-15/U
Recommended Max Cable Length	250 M 825 ft	500 M 1650 ft	600 M 1980 ft	800 M 2640 ft

2. The power is DC 12V (+/- 10%) / 350mA. Use the following recommendations for cable types and distances:

12V DC Recommended Wire Size and Resistance (68°F)			
Copper Wire Size (AWG)	#24 (0.22 mm <sup>2</sup> )	#22 (0.33 mm <sup>2</sup> )	#20 (0.52 mm <sup>2</sup> )
Resistance (Ω/m)	0.078	0.050	0.03
Resistance (Ω/ft)	0.024	0.015	0.009

Use the formula below to calculate the power cord and power supply. "L", "R", "VA", "I" shall satisfy the inequality below:  
 $10.8 \text{ V DC} \leq VA - 2(R \times I \times L) \leq 16 \text{ V DC}$   
L = Cord length (m or ft)  
R = Resistance of copper wire (Ω/m or Ω/ft)  
VA = DC output voltage of power supply unit  
I = DC current consumption (A).

3. Connect power supply to the camera's POWER IN terminal.

## On-Screen Display (OSD) Settings

The OSD control is on the back of the camera. Hit the center button to activate the OSD settings . For further definition of each setting see the eLine website <http://www.elinetechnology.com>.

## Specifications

Feature	Specification
Minimum Illumination	0.001 Lux
S/N Ratio	More than 50dB
Scanning System	2:1 Interface
Synchronous System	Internal, Negative sync
Auto Electronic Shutter	NTSC: 1/60s~1/100,000s / PAL: 1/50s~1/100,000s
Gamma Characteristic	0.45
Video Output	1.0Vpp. 75Ω
Auto Gain Control	Auto
Power/Current	DC 12V (+/-10%) 350mA / Dual Voltage (Model Dependent)
Dimension	110 x 45 x 55 mm
Weight	300g
Storage Temperature	-30°~60°C RH 95% Max
Operating Temperature	-10°~45°C RH 95% Max

## Troubleshooting

### *No picture after providing power*

- Check the power connection to the power supply to the power outlet for connectivity.
- Check the power supply voltage.
- Check all connecting cable and monitors for loose connections.
- Check the monitor settings

### *The picture has interference or ripples*

- This may be caused by the power supply's arc, poor quality cable, too long cable, or improper ground connection.

### *The picture background color changes continuously*

- A fluorescent light's electromagnetic field may cause color roll. Reduce the number of fluorescent lights or increase the distance between the camera and the lights to reduce this effect. Use of a power supply with external sync may solve the problem.

### *Blurred Image*

- Check the dome cover for dirt or imperfections
- Check the focus to make sure adjusted correctly
- Check the lens of the camera to make sure it is clean. Only use a dry, clean lens cloth to clean the lens. Never touch with your fingers.

## Warranty Repair/Replacements

Subject to the terms of the limited warranty in effect at the time of purchase, eLine will repair or replace a product that fails to meet the terms provided, within the product's warranty period. eLine reserves the right to replace any product under warranty with new, refurbished or remanufactured product. For product purchased directly from eLine by a dealer or an integrator, the warranty period starts from either a) the date of shipment from eLine's facility (point of origin) or b) the manufacturer's date code (if the shipment date is unknown). Except for software products (which shall be treated as if purchased directly eLine for purposes of determining the start of the warranty period as set forth in the immediately preceding sentence), for product purchased from an authorized eLine distributor by a dealer or an integrator, the warranty period starts from the date the product is purchased by the dealer or integrator. Warranty periods vary based on product category and type of equipment, as shown in Table 1 entitled "Product Warranty Periods" below.

We will return equipment or ship replacement equipment via the same incoming ship method at no additional charge. If you request a different return ship method, we will charge for the full shipping cost.

### *Product Warranty Periods*

Table 1 lists warranty durations for most eLine equipment, sorted by category. Warranty periods start as set forth under the heading "Warranty Repair/Replacements" above. For items that do not appear in Table 1, contact Customer Service or your sales rep for the applicable policy.

Product Type	Product Warranty	Exceptions
eLine Cloud Cameras	2 years	PTZ Cameras – 1 year
Other eLine	2 years	----
